

N'viro Solve™

good for the plane / good for the planet

FAST-ACTING, BIO-BASED AIRCRAFT BELLY DEGREASER

N'Viro Solve

N'Viro Solve is a bio-based, organic cleaner made from various plant and fruit derivatives. This naturally occurring degreaser removes baked-on oil deposits, as well as heavy grease, from painted and unpainted surfaces.

N'VIRO SOLVE takes the place of the flammable and carcinogenic cleaners that are often used to remove oil/grease based belly grime and stains from aircraft surfaces.

- Dissolves oily buildup that other types of degreasers can't touch
- Dilutes with, and rinses easily with, water
- Contains no chlorinated or petroleum-based solvents

INDUSTRIES

Agriculture
 Aviation
 Concrete
 Construction
 Marine
 Mining

APPLICATIONS

Cleaning and degreasing engines
 Removing belly grime and stains from aircraft
 Cleaning and maintaining ground equipment
 Cleaning and degreasing tractors, spray rigs
 and earth moving equipment

TECHNICAL SPECIFICATIONS

Appearance: _____ Transparent, non-viscous liquid
 Odor: _____ Citrus
 Color: _____ Brown
 pH: _____ 7.5 @ 10% dilution
 Flash Point: _____ 110°F (Tag Closed Cup)
 Percent Volatile by Volume: _____ 21
 Solubility in Water: _____ Emulsifiable
 Bio-based Content: _____ >90% by weight
 VOC Content: _____ 21% by weight
 Petroleum Solvent Content: _____ 0
 Carcinogenic Chlorinated Solvents: _____ 0
 Ozone Depleting Substances: _____ 0
